

Animal Research Facts

Test your knowledge of the field of laboratory animal science.

If you have been through the Kids-4-Research site, this should be fairly easy for you.

1. Which of the following items are dangerous for your dog to eat or drink?
 - a. chocolate
 - b. antifreeze
 - c. aspirin
 - d. all of the above
2. Which of the following could be harmful to people if misused?
 - a. vitamins
 - b. water
 - c. household cleaners
 - d. all of the above
3. Which of the following careers is NOT involved in laboratory animal science or testing?
 - a. engineer
 - b. animal technician
 - c. veterinarian
 - d. police officer
4. Which of the following groups does not benefit from laboratory animal science and biomedical research?
 - a. children
 - b. infants
 - c. dogs and cats
 - d. zoo animals
 - e. all of these groups benefit from research
5. Which of the following is NOT the responsibility of the laboratory animal technician?
 - a. conducting research
 - b. providing food, water and housing for lab animals
 - c. reporting signs of disease
 - d. observing environment and reporting changes
6. Very small microbes which live and reproduce in the cell and are NOT killed by antibiotics are called:
 - a. viruses
 - b. bacteria
 - c. fungi
 - d. parasites
7. A disease that is easily transmitted from one animal to another is said to be:
 - a. infectious
 - b. contagious
 - c. nutritional
 - d. genetic
 - e. zoonotic
8. Which of the following conditions is not caused by an infectious agent, such as a bacteria or virus?
 - a. Herpes
 - b. Ringworm
 - c. Colds
 - d. Scurvy
9. Only three cents of every health care dollar is spent on medical research.
 - a. True
 - b. False
10. Animal researchers frequently steal pets to use in research.
 - a. True
 - b. False
