

Switcheroo

Start with the words “Biomedical Research” and follow the instructions on each line. Rewrite the jumbled letters on the spaces provided. By the time you reach the end, a special message will be revealed! Developed by: Vicki Koch B.S., RLATG, February 2002.

1. Switch the O and the S
2. Put the L in between A + R
3. Delete the B
4. Place the D to the left of the first I
5. Switch the second C and M
6. Insert a T in between the first A and the first R
7. Move the H to the right of the T
8. Swap places with the R and E which are next to each other
9. Delete the last consonant
10. Insert a V in place of the second I
11. Place the second C 5 spaces to the right
12. Duplicate the letter in the 9th space and place it after the second C
13. Delete the first R
14. Create 2 more E's and place at the far right
15. Add the 7th letter of the alphabet in between the 2 Es
16. Delete the first E and move the O to its place
17. Add an L next to the other L
18. Delete the letter to the right of the V
19. Place the R next to the V
20. Move the vowel in the 13th space to the seventh space
